For: RESIN SHEETS CONTAINING DISPERSED PARTICLES AND LIQUID CRYSTAL  
DISPLAYS

INFORMATION DISCLOSURE STATEMENT  
UNDER 37 C.F.R. §§ 1.97 and 1.98

Commissioner for Patents  
Washington, D.C. 20231

Sir:

In accordance with the duty of disclosure under 37 C.F.R. § 1.56, Applicant hereby notifies the U.S. Patent and Trademark Office of the documents which are listed on the attached Form PTO-1449 and/or listed herein and which the Examiner may deem material to patentability of the claims of the above-identified application.

One copy of each of the listed documents is submitted herewith.

The present Information Disclosure Statement is being filed: (1) No later than three months from the application's filing date for an application other than a continued prosecution application (CPA) under § 1.53(d); (2) Before the mailing date of the first Office Action on the merits (whichever is later); or (3) Before the mailing date of the first Office Action after filing a request for continued examination (RCE) under § 1.114, and therefore, no Statement under 37 C.F.R. § 1.97(e) or fee under 37 C.F.R. § 1.17(p) is required.

In compliance with the concise explanation requirement under 37 C.F.R. § 1.98(a)(3) for foreign language documents, Applicant submits the following explanations:

INFORMATION DISCLOSURE STATEMENT  
Attorney Docket No. Q64487

Japanese Patent Application No. 6-238853 discloses a transparent film comprising an epoxy resin and an inorganic oxide. On the other hand, the present invention is characterized in that inorganic oxide particles are dispersed in base layer. Thus, structure differs between this reference and the present invention.

Japanese Patent Application No. 7-24400 discloses a coating film having inorganic fine particles dispersed therein. On the other hand, in the present invention, inorganic oxide particles are dispersed in a base layer. Thus, structure differs between this reference and the present invention.

Japanese Patent Application No. 11-64611 discloses a light diffusing sheet and corresponds to the prior art described in the first full paragraph on page 2 of the present specification. The resin sheet containing dispersed particles according to the present invention is mainly used as a liquid crystal cell substrate. Even though a light diffusing sheet is not used, the sheet of the present invention can prevent glitter and exhibit good display characteristics.

The submission of the listed documents is not intended as an admission that any such document constitutes prior art against the claims of the present application. Applicant does not waive any right to take any action that would be appropriate to antedate or otherwise remove any listed document as a competent reference against the claims of the present application.

Respectfully submitted,

Mark Boland  
Registration No. 32,197
